globe
GROWING SOLUTIONS
Product Catalogue
April 2020

Our History

Established in Sydney in 1972, Globe Globe Growing Solutions originally traded as ‘Greenkeeping Supplies’, focused on supplying products mainly to the sportsturf industry. As the business grew, so did the need for new and different products.

In 1978, Globe acquired the chemical production company Barnes-McGrath, soon renamed Barmac. This acquisition enabled Globe to consolidate its business and quickly became the largest privately-owned manufacturer and distributor of horticultural products in the Australian market.

As the business grew, so did its market. Where once the focus was on the bowls and golf sportsturf, Globe quickly became a leading supplier to the larger turf amenity and horticulture market which included governments, contractors, racetracks, schools, turf farms and landscapers.

By the late 1990s Globe had warehouses nationally, this coupled with our unrivalled brand association made Globe extremely successful in the market.

In 2001, Globe acquired Turfwell Sales, a machinery company specialising in sportsturf equipment for bowling and golf clubs. This business has evolved into Equipment Solutions. Supplying world leading technologies and design by leading brands such as Dakota, Blec, Graden, Groundsman, AgriMetal and First Products.

In 2012 CK Life Sciences International Holdings, acquired the Globe Group of companies including Globe Growing Solutions, Globe Pest Solutions, Equipment Solutions & Barmac. CK Life Sciences had already been active in the market acquiring a number of companies such as, Amgrow Home Garden, Patons and Fertico. These were all consolidated under the Amgrow Group in 2011.

Mission Statement

Globe Growing Solutions has evolved into a relationship-driven distribution business, focused on delivering market leading service to our customers in the sportsturf and amenity horticultural industries. We achieve this through our national network of warehouse locations, our unrivalled association with leading suppliers, our ability to produce and supply our own range of products and our exceptional people.
