

2SPEC

Premium Sportsturf Fertiliser

ACCELERATE 30:1:6 with 24% CRN + 5%FE & 1%Mn

2SPEC Accelerate has been formulated to provide rapid colour and growth response from the high proportion of plant available nitrogen, and inclusion of iron and manganese for colour. Containing 24% of nitrogen as polymer sulphur coated urea (PSCU), 2SPEC Accelerate is ideal for use throughout the growing season, in particular when rapid growth is desired.

ELEVATE 23:1:10 with 40% STABILISED NITROGEN + 4%FE & 2%Mn

The improved 2SPEC Elevate formulation is the ideal product for enhancing existing turf cover. 2SPEC Elevate provides excellent colour and a high level of turf growth due to its 40% stabilised nitrogen with added iron and manganese. This product applied at routine intervals will provide an exceptional deep colour with excellent growth.

ENDURANCE 20:0:20 with 40% CRN + 2%FE & 1%Mn

The improved formulation of 2SPEC Endurance is the ideal formulation for when turf requires a balance between growth and durability. The equal potassium to nitrogen ratio builds strength in the plant to cope with the stresses of wear, seasonal demands, and disease pressures at the same time providing an even, resilient growth pattern. 2SPEC Endurance is ideal for managing N to K inputs throughout the growing season, in particular prior to the onset of dormancy to provide a sustained supply of N and K throughout the winter period.

ESTABLISH 15:10:10 with 43% CRN + 3% FE

Containing a high level of phosphorus, 2SPEC Establish provides the ideal formulation for use when establishing new turf, or in situations when root growth is required. The inclusion of 43% controlled release nitrogen ensures 2SPEC Establish provides a sustained supply of nitrogen for weeks after application. Ideal for use in sportsfields, tees & fairways, racetracks and other high cut turf situations. Designed for use at times of seeding, turfing or sprigging to provide essential nutrient for establishment.

SUSTAIN 30:1:5 with 82% CRN + 1.5%FE & 1%Mn

2SPEC Sustain is the ideal formulation for use where excellent colour and a longer period of slow release is required. Ideal for the maintenance of high quality turf when frequent applications are not possible. 2SPEC Sustain has the lowest burn potential of the 2SPEC range.
