GROWING SOLUTIONS

Andersons Nutri DG Turfstarter 12-11-7 is a premium high phosphorous greens grade slow release fertiliser harnessing Andersons patented DG Technology.

Dispersive delivery system ensures nutrients are delivered straight into the soil following irrigation, minimising mower pickup and optimising plant response.

High phosphorus formulation with true slow release nitrogen, ideal for use during turf establishment and grow in or for use during renovation.

Dispersive technology delivers nutrient straight to the soil where it is required.

Pack size 20kg

Guaranteed Minimum Analysis	
TOTAL NITROGEN (N)	12%
- as methelene urea	5.2%
- as ammonium	6.0%
- as urea	0.8%
TOTAL PHOSPHORUS (P)	10.5% as ammonium
TOTAL POTASSIUM (K)	6.6% as sulphate
TOTAL MAGNESIUM (Mg)	0.5% as sulphate
TOTAL SULPHUR (S)	4.9% as sulphate
TOTAL IRON (Fe)	0.3% as sulphate
TOTAL MANGANESE (Mn)	0.5% as sulphate

Benefits of Turfstarter

Comes in greens grade prills of 75 SGN and readily disperses when contacted by water forming many individual particles restoring nutrients to the soil.

The small prill size allows this product to be safely spread over greens without causing surface disruption, when watered each small prill breaks down into even smaller granules resulting in faster distribution into the soil profile and less potential for mower pickup.

Advanced dispersing granule technology ensures maximum coverage and performance. For use on greens, tees, and other closely mowed turf. High phosphorus formula helps correct phosphorus deficiencies and aids in turf establishment from seed or laying turf. 50% of nitrogen is derived from MUtech™ methylene urea for extended feeding. The other 50% of nitrogen is derived from ammonium sulphate for immediate turf response.

Contains the trace elements iron, manganese, and magnesium.

Directions for use

Apply product to actively growing turf at 1.5 - 2.5 kg/100m².

Use lower rates for cool season turf. Use higher rates for warm season turf.

Apply to dry foliage.

Water in after application with 3-4 mm of irrigation.

If temperatures exceed 30° C or if application to damp or wet turf is unavoidable, irrigate immediately after application.
