

Crowbar

A post emergent herbicide

globe
GROWING SOLUTIONS

GROUP **A** HERBICIDE

Active ingredients 375g/L diclofop-methyl

Pack size 20L

For the post emergent control of crow'sfoot grass in all turf situations, including kikuyu, hybrid couch, Qld blue couch, common couch, buffalo, hybrid couch, tifway, carpet grass and salt couch

Key benefits of Crowbar

- A systemic selective herbicide which effectively kills target grass weeds.
- Also absorbed via the roots if moisture present in the root zone.
- Some residual activity in soil on later germinating weeds.
- Easy to use and apply and can be tank mixed with compatible pesticides and fertilisers.

Directions for use

Fill the spray tank to about two thirds full with clean water and then add the required amount of Crowbar herbicide. Add the remainder of the water with agitation system engaged. If a wetting agent is required add this last to prevent excessive foaming.

Aim to apply this product to base of weeds to ensure penetration.

Application Rate Table

Situation	Weed	State	Rate	Comments
Kikuyu, hybrid couch cv. Tifward	Crowsfoot grass (<i>Eleusine indica</i>)	Qld, NSW, ACT only	1L/ha or 100mL in 100L water per 1000m ²	Apply to weeds between the seeding and tillering stage for the best results. Use lower rates for seeding and higher rates for established grass weeds. A repeat spray may be needed in 2-4 weeks. Results are best when Crowbar herbicide is applied under good growing conditions and weeds have sufficient leaf area ie 2-3 days after mowing.
Qld blue couch			1-1.5L/ha or 100- 150mL in 100L water per 1000m ²	
Common couch, Buffalo, hybrid couch cv. Tifway, carpet grass, salt couch			1-2.5L/ha or 100- 250mL in 100L water per 1000m ²
