

Germinator Triple Elite

Perennial Ryegrass Blend

ANTEP & NTEP
Tested Ryegrass
Varieties

Triple Elite is a blend of three DLF seed varieties that have performed extremely well in ANTEP and NTEP testing. The three varieties in Triple Elite are selected to perform in Australian conditions. These perennial ryegrasses consistently show top results with respect to dark colour, winter activity, quick establishment, disease resistance, density, heat and wear tolerance.

Key Attributes

- Fast establishment
- Outstanding dark green colour
- Disease resistance
- Excellent heat and wear tolerance
- Increased density

Uses

Triple Elite provides all the essential qualities required for a premium turf surface to withstand the rigours of winter sports activity. It is a durable, all round solution for over sowing council sports fields, elite stadiums, golf courses, landscape areas and parklands.

Sowing and Establishment

Sowing Rates:

3-5 Kg per 100m². Seeding rates will vary depending upon the outcome required. For best results consult your Globe Client Manager for assistance.

Nutrition:

Establishment: Apply 2 SPEC Establish at 3 Kg per 100m².

Post Germination: Apply Fertech Complete at 400ml per 100m² to encourage growth and tillering of young plants.

Maintenance: Apply 2 SPEC Elevate at 2.4 kg per 100m² to maintain base nutrition. Apply Fertech Special FeX at 400ml per 100m² for enhanced turfgrass colour.

All Globe seed mixtures are blended in accordance with the Australian Seed Federation's code of practice. Each seed line within the mixture has undertaken strict testing guidelines which includes total seed purity % and minimum seed germination %. All bags are clearly labelled with seed certificate available upon request - this ensures that the highest standards and the needs of our customers are met.
