Meteor®

Herbicide

ACTIVE CONSTITUENT:
960 g/L METOLACHLOR

GROUP K HERBICIDE

For the pre-emergent control of certain annual grasses in turf as specified in the Directions for Use table.

**MADE IN
AUSTRALIA**

DIRECTIONS FOR USE

Restraints:

DO NOT use on turf weakened by weather conditions or by physical damage due to intensive use or cultural practices such as scarification, coring, aeration and top dressing.

DO NOT apply to areas where prolonged periods of water-logging are expected.

DO NOT apply to Annual Rye Grass or Tall Fescue.

DO NOT apply to golf and bowling greens.

DO NOT apply this product through any type of irrigation system.

DO NOT apply with aircraft.

DO NOT use more than once per year.

Turf: DO NOT graze treated areas or feed lawn (turf) clippings from treated areas to animals, including poultry.

SPRAY DRIFT RESTRAINTS

DO NOT apply with spray droplets smaller than a COARSE spray droplet size category according to "APVMA Compliance for Mandatory COARSE or Larger Droplet Size Categories" located under this title in the GENERAL INSTRUCTIONS section of this label.

SITUATION	WEEDS CONTROLLED	RATE per/ha	CRITICAL COMMENTS
Established turf as named:- Couch (<i>Cynodon dactylon</i> cv. <i>Grand Prix</i>) Common Kikuyu (<i>Pennisetum clandestinum</i>) Zoysia (<i>Zoysia japonica</i> cv. <i>Empire</i>) Qld Blue Couch (<i>Digitaria didactyla</i>) Buffalo (<i>Senotaphrum secundatum</i> var. <i>Kings Pride</i>)	Winter Grass (<i>Poa annua</i>) Summer Grass (<i>Digitaria sanguinalis</i>) (<i>Digitaria ciliaris</i>) Crowsfoot Grass (<i>Eleusine indica</i>)	1-2 L/ha in a minimum of 400 L water/ha	Product must be watered in with a 2-4mm of irrigation. Not to be used on Golf and Bowling Greens. Mix with sufficient water volume in order to obtain good coverage. Use low rate for: • Pre-emergent control where lighter infestations are typical. Use higher rate for: • Pre-emergent control where heavy infestations are expected. • Where pre-emergent application is made early. • When longer residual control is required. Use on the named species and cultivars at recommended rates only as given in the situation column. Other varieties have not been tested.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

GENERAL INSTRUCTIONS

The product is a short residual, pre-emergent herbicide for the control of certain important annual grasses in the situations nominated. The product acts mainly through shoot (coleoptile) absorption. Its effectiveness depends on the occurrence of rainfall or irrigation to move it down into the top 3 to 4 cm of soil, where it must be present at the time of weed germination.

APPLICATION

Ground application: Apply in a minimum 400 L/ha of water. DO NOT apply with aircraft.

MANDATORY INSTRUCTIONS FOR GROUND APPLICATIONS

USE ONLY nozzles that the nozzles' manufacturer has rated to deliver a COARSE droplet size category as referenced to ASABE or BCPC.

Choose a nozzle specified to provide the droplet size category required in the label Spray Drift Restraints.

DO NOT use a higher spray system pressure than the maximum the manufacturer specifies for the selected nozzle to deliver the droplet size category required in the label Spray Drift Restraint.

MIXING

Add the required amount directly to the spray tank, fill with water and mix well.

COMPATIBILITY

Meteor Herbicide is compatible with Atrazine 500g/L and Glyphosate.

DO NOT USE ON SOILS CONTAINING LESS THAN 5% CLAY IN THE TOP 30 cm.

RE-ENTRY PERIOD

DO NOT enter treated areas until spray has dried, unless wearing cotton overalls buttoned to the neck and wrist (or equivalent clothing) and chemical resistant gloves. Clothing must be laundered after each day's use.

RESISTANT WEEDS WARNING

Meteor Herbicide is a member of the Chloroacetamide group of herbicides with diverse sites of action. The product is selective, reducing seed germination, inhibition of mitosis and cell division in its mode of action.

For weed resistance management, the product is a Group K herbicide. Some naturally occurring weed biotypes resistant to the product and other Group K herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by this product or other Group K herbicides.

Since the occurrence of resistant weeds is difficult to detect prior to use, Amgrow Pty Ltd accepts no liability for any losses that may result from the failure of the product to control resistant weeds. Strategies to minimise the risk of herbicide resistance are available. Contact your chemical supplier, consultant or local department of Agriculture.

PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS

DO NOT apply under weather conditions, or from spraying equipment, that may cause spray to drift onto nearby susceptible plants/crops, cropping lands or pastures or waterbodies.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

Overspray or drift into sensitive habitats should be avoided. For ground applications, a buffer zone of 10 metres is required between the downwind edge of the boom and the closest edge of the waterbodies.

DO NOT contaminate streams, rivers or waterways with the chemical or used containers.

STORAGE & DISPOSAL

Store in the closed, original container at or below 30°C in a cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight. It is recommended that the storage temperature never exceed 30°C. Triple rinse containers before disposal. Add rinsings to spray tank. DO NOT dispose of undiluted chemicals on-site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots, in compliance with relevant Local, State or Territory government regulations. DO NOT burn empty containers or product.

SAFETY DIRECTIONS

Harmful if inhaled. Will irritate the eyes. Repeated exposure may cause allergic disorders. Avoid contact with eyes. DO NOT inhale spray mist. When opening the container, preparing product for use and using the prepared spray, wear elbow length chemical resistant gloves, goggles and a disposable mist face mask covering mouth and nose. In addition, if applying by spraying equipment carried on the back of the user, wear cotton overall, over normal clothing buttoned to the neck and wrist. If product or spray in eyes, wash it out immediately with water. Wash hands after use. After each day's use, wash gloves, goggles and contaminated clothing.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 13 11 26.

MATERIAL SAFETY DATA SHEET

Additional information is listed in the Material Safety Data Sheet (MSDS) which can be obtained from the supplier.

CONDITIONS OF SALE: Amgrow Pty Ltd shall not be liable for any loss injury damage or death whether consequential or otherwise whatsoever or howsoever arising whether through negligence or otherwise in connection with the sale supply use or application of this product. The supply of this product is on the express condition that the purchaser does not rely on Amgrow's skill or judgement in purchasing or using the same and every person dealing with this product does so at his own risk absolutely. No representative of Amgrow has any authority to add to or alter these conditions.
