

APPLICATION HINTS:

Apply to the drip zone of the plant and lightly work into the soil surface or cover with an organic mulch. Be careful not to damage fine shallow surface roots as this renders them prone to fungal attack and fertiliser burn. Apply sparingly on potted plants as excessive fertiliser can cause burning relatively easily. It is much safer to apply small amounts on a regular basis.

IMPORTANT THINGS TO REMEMBER:

- Always water fertiliser well immediately after application. Watering should result in a thorough saturation of the area
- Avoid direct contact with plant roots, seeds etc
- Even, light and regular applications of this quality product will achieve the best results
- Always reseal bags after use and dispose of empty containers properly
- Sandy soils will require lower rates of fertiliser but more frequent applications
- Do not exceed the recommended application rates as this can be harmful to plants.

CAUTION: All fertilisers should be used with care. Wear gloves and protect eyes from splashing.

WARNING: Use of this product may result in cadmium residues in excess of the Maximum Permissible Concentration (MPC) in plant and animal products and may result in accumulation of these residues in soils.

AZALEA & CAMELLIA FOOD

Azalea & Camellia Food

- Promotes vigorous growth and healthy vibrant blooms.
- Promotes root development and stress tolerance.
- Specially formulated for Azaleas, Camellias, Rhododendrons, Daphnes & Gardenias.
- Complete range of essential nutrients including trace elements.

AZALEA & CAMELLIA FOOD

Azalea & Camellia Food

PRODUCT ANALYSIS:

Nitrogen as ammonium	4.8%
Nitrogen as organic	2.4%
Total nitrogen	7.2%
Phosphorus as citrate soluble	2.3%
Phosphorus as organic	1.0%
Total phosphorus	3.3%
Total potassium as sulphate	16.6%
Total sulphur as sulphate	10.2%
Total calcium	2.9%
Plus Zinc, Iron, Copper, Boron, Manganese, Molybdenum, Magnesium.	

Paton's Azalea and Camellia Food has been specifically blended to meet the requirements of Azaleas, Camellias, Rhododendrons, Daphnes and Gardenias. It is an organically based formulation containing a complete range of essential nutrients, including trace elements.

SUITABLE FOR:

Paton's Azalea and Camellia Food is suitable for general application to:

- Azaleas
- Camellias
- Gardenias
- Daphnes
- Rhododendrons

HOW MUCH DO YOU NEED:

YOUNG PLANTS: Apply 25-50 grams per square metre, 3 or 4 times a year. Feeding during the months of August, October, December and March will provide best results.

ESTABLISHED SHRUBS: Apply 50-75 grams per square metre, 3 or 4 times a year. Feeding during the months of August, October, December and March will provide best results. In sandy soils use less (approximately half) the application rates as advised above but feed more regularly. This will prevent excess nutrients leaching into the environment and provide more nutrient to the plant.
