

Drive XL

A post emergent herbicide

globe
GROWING SOLUTIONS

GROUP

I

HERBICIDE

Active ingredients 180g/L quinclorac

Pack size 5L

For the post emergence control of summer grass and white clovers and the suppression of kikuyu in turf.

Key benefits of Drive XL

- Quinclorac is rapidly absorbed through the foliage and translocated throughout the plant.
- Weeds die within 1-2 weeks after treatment.
- Kikuyu can be suppressed by applying two post-emergence treatments, with best results achieved in Autumn.

Directions for use

For boom spray application, apply in 400L of water per ha. Avoid overlaps during application. For spot spray application, apply to point of run off. DO NOT apply through any type of irrigation system. DO NOT mow 2 days before or after applying Drive XL to maximise weed control and minimise turf injury.

Application Rate Table

Situation	Weed	Rate	Comments
Common couch, hybrid couch, Japanese lawnglass, marine couch, perennial rygrass, creeping bentgrass, Kentucky bluegrass	Summer grass	4.6L per 400L water	<u>One application:</u> Weeds at cotyledon stage up to prior to second tiller OR weeds at 5 tillers and greater <u>Two applications:</u> 21-28 days apart: Weeds from 2-4 tillers. The addition of a crop oil adjuvant may improve weed control in favourable weather conditions.
	Kikuyu (suppression only)		For kikuyu suppression, apply twice, 14-21 days apart. Best results are gained from Autumn applications. The addition of a crop oil adjuvant may improve weed control in favourable weather conditions.
	White clover		Apply to actively growing weeds.
COMPATIBILITY	Compatible with DSMA, Primo 250EC and Primo Maxx
