

TRACER

TURF TYPE NIL ENDOPHYTE PERENNIAL RYEGRASS

Tracer Perennial Ryegrass is a NIL endophyte perennial ideally suited for oversewing of warm season turf or sportsfields. It exhibits excellent colour, density and durability through the winter playing period.

Features:

- Quick establishing
- Better traffic tolerance
- Improved greenup and coverage
- NIL endophyte
- Improved spring/summer transition

Fight against stress

Tracer has demonstrated its ability to withstand the heavy rigours of winter activity with excellent seasonal growth.

Applications

Where a NIL endophyte variety is preferred Tracer is the ideal choice and will provide an attractive, dense playing surface throughout the season.

Seeding Rates:

- New Establishment: 4-5kg per 100m²
- Overseeding Warm Season Grasses: 3-5kg per 100m²
